COAL. COAL. COAL.

The Chances Are You Pay For Coal You Do Not Get.

Some manufacturers—some general managers are more interested in their automobiles than in the coal they burn.

Our large customers of Birmingham are now required to raise the pound of water one degree in temperature.

The chances are fifty to one that you are not getting such coal.

WEBSTER COAL

The oxygen mixed most readily with the necessary carbon properties to give a perfect combustion and greatest possible heat with very little smoke—almost none at all.

Further particulars made on request. Our chemist and mechanical engineer are at your service.

A Hundred Years Ago Today

In a lonely Kentucky cabin one cold and wintry night, on an humble seat, there came a child, to greatness born.

Amid surroundings proscribed and baneful he grew up an infant, stern, and in power of mind and strength of body, developed the full flower of his individuality.

In due time the world acclaimed him the greatest American since Washington, and the greatest and most heroic exponent of Human Liberty that has trod the earth for two thousand years.

In the days of his young manhood there was storm and terror in the land, and rightful domination.

At twenty, on the Mississippi's lonely beam, he sailed at the oar for Ireland. At twenty-four he was a pioneer and a captain in the Black Hawk war. At twenty-five he was a steady and unflinching investigator of the cause of the war and the oppressor. At thirty-seven he became a Congressman.

Thus came three great manhood upon him—and step by step he rose to peace and power, until at last in the government of a vast republic and in the affection of all mankind he stood alone and abiding.

Ever thereafter beneath the skies a Christian born of sinners and profound pity, a true champion of the Lord of Hosts, it was ABRAHAM LINCOLN.

In the words of the great Common People he gave Hellfire and hell, and nothing made him more judgment than attempted legislative tyrannies or usurpations of any kind whatsoever. The "dilettante" compromise laws he would not prescribe by statute what other men should act and do.

When fellow politicians attempted to impose the No-Action License Law upon the young State of Illinois, he arose (Dec. 18, 1847) "like Samson in the prophet's" and took a nation which had to let itself and time extinction by a sweeping vote of 77 to 1.

Upon another famous occasion he declared: "When the white man governs himself, that is self government; but when he governs himself and another man, that is more than self government—that is DOMINATION."

With equal truth he was positively stern—that also to PROHIBITION.

THE HISTORY OF THE MANLY ART
In our Sunday's Sun
Barrett O'Hara,
the famous sporting expert, begins a series of interesting articles on the history of manliness. He will tell the story of all the great athletes of the past, from the heroes of the Greek and Roman world to the champions of the Middle Ages, and will show how the principles of the Manly Art have been handed down through the centuries. This will be a series of interesting and instructive articles, and will be a valuable addition to the Sunday Sun.
See other complete history of the printing has ever been written.
Mr. O'Hara's first article will deal with James Pigg, the first championed barrow, who died in 1774. There will also be accounts of an ancient and third champion barrow.
